

Problems

- Notifications don't work
- The phone planner won't sync with the computer calendar
- Day, Month, and year don't sync up

Essentials

- Notification system
- Option to select location
- Option to have an event repeated
- Add one event on a specific day and time
- Day, month, and year sync with current
- Events can be edited
- Calendar function
- Small two sentence box for information on the event

Addons

- Have option for multiple notifications
- "Week at a glance"
- Event details can stay the same but time changes
- Different Time zones

Essentials

- Google calendar
- iPhone Calendar
- Physical Calendars

Who will use

- Personal use
- Commercial use
- Management use

Platforms

- Phones
- Computer/laptops
- Tablets

UI style

- Very simple UI elements, not too complicated
- User can change things like font, color, etc.
